

DURATHERM
Heat Transfer Fluids

K. Rose

I not only gathered information on your products, but also the products of others. You educated me and provided test results to show the differences. **We have had the Duratherm 600 in our tanks for almost a year now, and it is working great.** Your free testing of the fluid just helps to show that you are committed to your customers and to making sure they have something that lasts and works to their satisfaction.
